### **OTHER FEATURES**

1. A snap-on hopper lid to prevent high cost material like clover seed from blowing out or to keep moisture out of the hopper.
2. A 12-volt electric motor with a variable speed control. Precision spreading can be accomplished for most seed conditions.
3. A proven 2-opening seed gate that closes tightly and can be reopened to the same setting.
4. An aluminum fan used for years on other electric and mechanical drive seeders.
5. A mud and water shield to protect the spreader fan.
6. Complete wiring harness with simple clips to fasten to the battery terminals.
7. A special lightweight, high strength design that allows the entire unit to be mounted or taken off in minutes.
8. A control lever that is easily reached by the operator and can be opened each time to the desired material gate setting. Seeding Chart on each unit gives approximate setting.
